---

### Harden Network & Connectivity

#### Set Private DNS

Go to → Settings → Network & Internet → Private DNS  
Choose → Private DNS Provider Hostname  
Enter → dns.adguard.com (blocks trackers) or dns.quad9.net (security-focused)  
**Tap Save**

---

#### Disable Wi-Fi & Bluetooth Scanning

Go to → Settings → Location → Location Services  
Find & **Turn OFF:** Wi-Fi Scanning & Bluetooth Scanning

## Open Play Store App

- Select your profile picture in the top-right corner

- If enabled, it will show you recent scans and any harmful apps
- Tap the gear icon in the top-right
- General

**TURN BOTH SETTINGS ON**

## Open Phone Settings
